Letter of recommendation for Amartya Kaviraj

To Whom It May Concern,

It is my great pleasure to provide this letter of recommendation for Amartya Kaviraj, who was employed under my supervision as a Research Assistant (Studentische Hilfskraft) for Project and Academic Support from April 2023 to April 2024 at TH OWL University of Applied Sciences and Arts. During his tenure, Amartya was an integral part of my team, bridging the gap between academic research and practical project execution within the Campus Foundry OWL.

EORI-Kennnummer: DE 538 644 6

In his role, Amartya demonstrated exceptional organizational talent and a deep understanding of the entrepreneurial ecosystem. His responsibilities were diverse and demanded a high degree of reliability and professional maturity.

Project Coordination & Grant Support: Amartya was instrumental in the management of departmental initiatives and third-party funded projects, including "Exist Women" and "Impact Unicorn." He took full ownership of timeline and milestone tracking, ensuring that all deliverables met strict institutional and governmental deadlines. Furthermore, he provided invaluable assistance in the administrative preparation of grant applications and project reporting, showing a keen eye for detail and a thorough understanding of funding structures.

Stakeholder Management & Communication: As a central interface between the chair and external regional partners, Amartya managed high-level communication and event scheduling at the InnovationSPIN. His ability to navigate complex stakeholder landscapes—ranging from industry partners to

student founding teams—was exemplary. He optimized our internal resource planning and maintained our department's CRM tools with the utmost precision.

Academic & Rhetorical Support: Beyond administration, Amartya supported my teaching activities by preparing high-impact presentation materials for modules such as "Rhetoric and Presentation" and "Start-Up Engineering." Leveraging his own victory in the "ScienceSlam" and his status as a FameLab Deutschland finalist, he provided formative feedback to students on their pitch decks and rhetorical performances. His contributions significantly enhanced the quality of our digital education media.

Amartya's work was consistently characterized by a proactive "can-do" attitude and a structured, agile approach (utilizing methodologies like Scrum/Kanban). He possesses a rare combination of analytical prowess and "people skills," making him a natural leader in group settings.

Amartya Kaviraj has performed his duties to my fullest satisfaction. He is a highly motivated professional who would be a significant asset to any organization, particularly in roles involving project management, business development, or innovation consulting. I recommend him without reservation and wish him the very best in his future career.

Sincerely,

Prof. Dr. Daniel Hunold

Professor for Creative and Cultural Entrepreneurship
